

## PROJECT OVERVIEW

**Square Feet:** 350,000/sf

**Factory Qualified Installer:** PCL/Sentinel Systems, Inc.

**Architect:** Gensler

**Owner:** The Triple Five Group

## PROJECT DESCRIPTION

After a long 16 year delay the New Jersey mega mall **AMERICAN DREAM** has become a reality. **The Triple Five Group**, owners of Mall of America and the West Edmonton Mall have brought an indoor entertainment destination to North Jersey. **POLYCOAT Products** line of waterproofing and coating systems were selected for the amusement and waterpark areas.

## PRODUCTS USED

The **Polyprime FMB** moisture vapor and methane barrier was applied to mat slabs to ensure that moisture vapor and methane gas would not migrate through the topping slabs. The **Polyprime FMB** also provided an excellent bond between the 16 year old mat slabs and the fresh poured topping slabs. **POLYCOAT Deck Coating Systems** were used on the pedestrian walkways and roof decks to provide waterproofing and unique decorative color options. **POLYCOAT STAINGARD 7000 Polyaspartic Topcoat** was used due to its fast cure, excellent chemical resistance and fast return to service abilities.

**PROJECT PROFILE:**  
**AMERICAN DREAM**  
*East Rutherford, NJ*

**POLYCOAT  
PRODUCTS**  
A Division of American Polymers Corp.
