

## POLYCOAT PRODUCTS

A Division of American Polymers Corp.

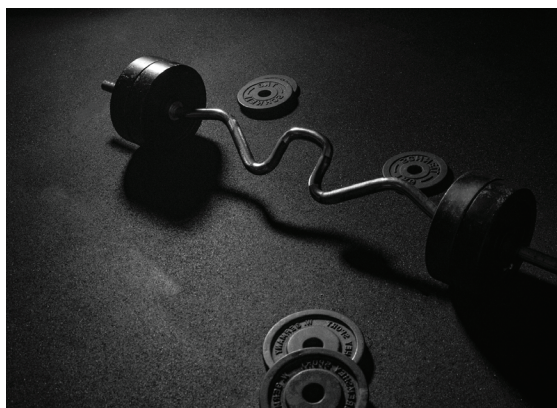

## Recreational Products Binders and Adhesives

Advancements at Polycoat Products have resulted in improved binders for multiple applications that include wider temperature and humidity ranges, surface coatings, and binders for many substrates. Product formulations with high tensile strength, elongation, and tear resistance have been developed in our state-of-the-art labs designed to exceed customer expectations. Additionally, our materials are field tested extensively to insure we meet our customers' demanding applications.

Polycoat Products has been an industry leader in polyurethane and polyurea flooring and surface systems for over 30 years. Our goal has always been to innovate and continually offer cutting-edge materials that add product and cost benefits to our customers.

We have over 800,000 square feet of manufacturing space in six chemical facilities located in three sites across the United States to produce and quickly supply large volumes of products nationwide and internationally. At these locations, all products have numerous quality control checks to assure product excellence and consistency.

Our goal will always be to provide high quality, cost-effective products for our discerning customers.

### AROMATIC BINDER 200

Aromatic Binder 200 is a 100% solids, aromatic isocyanate, single component, moisture cure binder for rubber, SBR, EPDM, TPV granules and various rock aggregates.

### AROMATIC BINDER 300

Aromatic Binder 300 is a 100% solids, fast-cure aromatic binder for low temperature and low humidity applications. It is a single component, moisture cure binder for rubber, SBR, EPDM, TPV granules and various rock aggregates.

### AROMATIC BINDER 100

Aromatic Binder 100 is a 100% solids, slow-cure aromatic binder for high temperature and high humidity applications. It is a single component, moisture cure binder for rubber, SBR, EPDM, TPV granules and various rock aggregates.

### ALIPHATIC BINDER 5609

Aliphatic Binder 5609 is a 100% solids, aliphatic isocyanate, single component, moisture cure binder for rubber, SBR, EPDM, TPV granules and various rock aggregates.

### ALIPHATIC BINDER 5609F

Aliphatic Binder 5609F is a 100% solids, fast-cure aliphatic binder for low temperature and low humidity applications. It is a single component, moisture cure binder for rubber, SBR, EPDM, TPV granules and various rock aggregates.

### ALIPHATIC BINDER 5609S

Aliphatic Binder 5609S is a 100% solids, slow-cure aliphatic binder for high temperature and high humidity applications. It is a single component, moisture cure binder for rubber, SBR, EPDM, TPV granules and various rock aggregates.

### ALIPHATIC BINDER 7000

Aliphatic Binder 7000 is an aliphatic isocyanate, single component, moisture cure binder for rubber, SBR, EPDM, TPV coating top surfaces. It has low viscosity for topcoat and resurfacing uses. It is not designed for mixing with rubber or other granules for troweling purposes.
